

ACTIVE SHOOTER

1.10
SHOOTINGS
PER WEEK

In today's world there is no safe place from an active shooter situation. It is increasingly important for public institutions, hospitals, corporations, schools, and places of worship to develop prevention and response procedures that can address an active shooter situation. To respond effectively you must be able to recognize the sound of gunshots and adopt a survival mindset (run, hide, fight) during times of crisis.

The most effective way to train your parishioners, staff, and students to respond to an active shooter situation is to conduct mock Active Shooter training exercises. Sentry Security provides Active Shooter Readiness Training. Our team of specialists create exercises tailored specifically to your facility.

21 weeks into 2018, and there have already been 23 school shootings where someone was hurt or killed. That averages out to more than 1 shooting a week.

The parameters CNN followed in this count are:

- A shooting that involved at least one person being shot (not including the shooter)
- A shooting that occurred on school grounds
- Included grades K through college/university level
- Included gang violence, fights and domestic violence
- Accidental discharge of a firearm as long as the first two parameters are met

2000-2018 (May)

Number of school shooting EVENTS	152
Number of school shooting DEATHS	168
Number of school shooting INJURIES	252

SOURCE:

"There has been, on average, 1 school shooting every week this year"
